

JavaScript Practice Exercises (12 Examples with Values)

1) Coffee Shop Bill

Simulate ordering a coffee:

- Choose size (small=45, medium=55, large=65)
- Add extras (milk +5, syrup +7, extra shot +10)
- Apply student discount (20%) if confirmed
- Add 14% VAT

Example: Large (65) + Milk (5) = 70 → Student -20% = 56 → VAT 14% = 63.84

2) Taxi Fare Estimator

Estimate taxi fare:

- Base = 20 EGP, Per km = 6.5 EGP
- Enter kilometers (e.g. 10)
- Add night surcharge (10%) if confirmed
- Apply promo code SAVE10 for 10% discount
- Add 14% VAT

Example: $20 + (10 \times 6.5) = 85$ → Night +10% = 93.5 → Promo -10% = 84.15 → VAT = 95.93

3) Gym Membership Calculator

Calculate membership cost:

- Monthly = 350 EGP
- Enter number of months
- Discount: 6+ months (10%), 12+ months (15%)
- Add personal training for 200 EGP
- Add 14% VAT

Example: 6 months → $6 \times 350 = 2100$ → -10% = 1890 → PT +200 = 2090 → VAT = 2382.6

4) Simple Checkout

Simulate online checkout:

- Enter item price × quantity
- Free shipping if subtotal $\geq$ 1000 EGP, otherwise 60 EGP
- Apply coupon % discount if available
- Add 14% VAT

Example: Price = 250 × 4 = 1000 → Free shipping → Coupon 10% → 900 → VAT = 1026

5) Electricity Bill

Calculate electricity cost:

- First 100 kWh at 0.75, rest at 1.20
- Optional service fee 5 EGP
- Add 14% VAT

Example: 120 kWh → $(100 \times 0.75) + (20 \times 1.2) = 99$ → Service +5 = 104 → VAT = 118.56

6) Exam Grader

Grade an exam:

- Enter score (0–100)
- Bonus +3 points for good attendance
- Cap at 100
- Determine grade (A/B/C/D/F)
- Pass if score ≥ 50

Example: Score=48 + Attendance +3 = 51 $\rightarrow$ Grade=D $\rightarrow$ Status: PASS

7) Mobile Recharge

Recharge mobile balance:

- Enter amount
- Apply 2% service fee
- Add 14% VAT

Example: 100 $\rightarrow$ Fee +2 =102 $\rightarrow$ VAT=116.28

8) Fuel Cost

Calculate fuel cost:

- Enter liters and price per liter (e.g. 12 EGP)
- Apply 5% discount if paying cash
- Add 14% VAT

Example: 40 liters $\times$ 12=480 $\rightarrow$ Cash -5% =456 $\rightarrow$ VAT=519.84

9) Currency Exchange

Currency exchange:

- Enter USD amount
- Rate: 1 USD = 48 EGP
- Apply 3% commission

Example: 200 USD $\rightarrow$ 200 $\times$ 48=9600 $\rightarrow$ -3% commission=9312

10) Parking Fee

Calculate parking fee:

- First 2 hours = 10 EGP total
- Each extra hour = 5 EGP
- Add 14% VAT

Example: 5 hours $\rightarrow$ 10 + (3 $\times$ 5)=25 $\rightarrow$ VAT=28.5

11) Cinema Ticket

Cinema booking:

- Ticket price=100 EGP
- Student discount 15%
- 3D glasses +20 EGP

- Add 14% VAT

Example: Ticket 100 + Glasses 20=120 → Student -15% =102 → VAT=116.28

12) Restaurant Split Bill

Split restaurant bill:

- Enter total bill

- Add 12% service charge

- Add 14% VAT

- Divide by number of people

Example: Bill=600, 3 people → Service +12%=672 → VAT=766.08 → Each=255.36
